

Administrators and students react to new late start ruling

The Council of Week-days handed down a historic ruling last month, deciding by a vote of 3-2 to put an end to the late starts, which were revered by the Deerfield student body. Instead, students will arrive an hour later every 100 day. A spokesperson for Monday, writing for the majority, claimed that the decision will set "a landmark precedent to once-and-for-all to do away with the 'Monday Blues' felt by many students."

"We really think we found a winner here," said district administrator Arnold Aardvark. Mr. Aardvark claims that the mastermind behind the new late starts was the same employee who brought to the district's countless other celebrated innovations, such as heart-rate monitor days, the temperature in X hall, and Paul Blart: Mall Cop 2.

Not everyone, however, was as enthusiastic about the schedule change. The spokesperson for Wednesday, dissenting, stated that "mid-week late starts are a cultural institution. What

Students prepare their hammers to demolish new alarms for next year's late starts

will students Instagram now on Tuesday and Wednesday mornings instead of a picture of brunch with friends? Would they post pictures of school-work? I wouldn't heart that." In an independent survey of the student body, 96% of students disapproved of the change.

The remaining 4% responded "lol wut no late starts? "

Some teachers as well were skeptical of the new plan due to the shortened 100 day class periods. "35 minutes is barely enough time to pretend to take attendance and have a half-hearted 'what did you do last weekend?' whip-around" complained Mr. Euler, a math teacher. "The whole thing is just irrational."

Unsuprisingly students' attitudes toward sleeping in remain unchanged. A student who requested not to be named told the reporters from the Flipside that he/she loved the idea of a new late start on monday. "I now can procrastinate an extra hour and a half on sunday night," they stated extactly, "because that's what this new late start is for anyways, right?"

What people say vs. what people really mean: summer edition

With summer just around the corner, students everywhere are trying to one-up eachother in their summer plans. Our correspondant, Notareal Person, caught up with the latest brags about people's summers.

WHAT THEY SAY
I'm going to stay home with friends and just hang out.

WHAT THEY MEAN
I'm going to sleep until 3 PM each day and then watch Netflix until 5 AM, when I'll go to bed and repeat the process until my eyes bleed tears of shameful joy.

WHAT THEY SAY
I've got a summer job so I'll be making a lot of money and spend my time relaxing.

WHAT THEY MEAN
I'm going to make minimum wage for a few hours a day and then I'll probably blow it all by the end of the summer, spending it on Chipotle and Starbucks. That "relaxing" will be spent watching Netflix (shocking, right?).

WHAT THEY SAY
I'm going on some trips with my family.

WHAT THEY MEAN
I'm going to complain about my family while vacationing in some re-

ally exotic place that other people would love to go to.

Sleep: the only thing that students will say they will do in abundance this summer, and actually will do in abundance this summer.

WHAT THEY SAY
I'm going to a ton of awesome concerts, like, basically, one a week-ish.

WHAT THEY MEAN
I'm going to Lollapooza and maybe a small show at Ravinia.

WHAT THEY SAY
I'm going to be proactive and get really ahead on my AP english summer work.

WHAT THEY MEAN
I'm going to be proactive and get really ahead on my AP english summer work.

WHAT ACTUALLY HAPPENS
"I thought it was due on the sixth?!"
"Yes, it was."
"Then, I don't see the problem...?"
"The sixth was yesterday."

- David Meyer

Flipside Poll

What are you looking forward to most after school ends?

- O-No more school
- O-That week before summer school starts
- O-Spending time with your friends
- O-Not having to spend time with your school "friends"
- O-Seeing the sun from outside of a room with small windows
- O-No more Flipsides (Just kidding, who wants that?!)

Deliver this slip to locker E458 for the secret to surviving finals

THE FLIPSIDE CRYPTOGRAM CHALLENGE: Solve the Cryptogram, and then give your copy of *The Flipside* to Evan Fischhoff. The first person to find him with a correctly solved puzzle will receive a copy of *The Flipside*.
